DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vanroye (US 5148897) in view of Winkelmann et al. (US 6640541).

Vanroye disclose a hydraulic shock absorber for a vehicle including a slide member 18, 44 slidably provided within a cylinder tube 12 and a working fluid chamber provided within the cylinder tube and the slide member, wherein a guide bush 23 coated with a polytetrafluoroethylene and an oil seal (see just below the head of the leader line from "18") sealing the fluid chamber disposed in an inner periphery of the cylinder tube so as to be in slide contact with an outer peripheral surface of the slide member.

Vanroye fail to disclose an amorphous hard carbon film disposed on the outer peripheral surface of the slide member. Winkelmann et al. disclose a piston including an amorphous hard carbon film disposed on the outer peripheral surface of the slide member. It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have included the coating of Winkelmann et al. on a piston according to Vanroye in order to suppress vibration to the slide member rod.

Re claims 2-3, see Winkelman et al. col. 5 lines 14-34.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pees et al., Lizell, Bell, and Duckett disclose related devices.
